PROFESSIONAL SUMMARY

Software Engineer with experience building full-stack, frontend, mobile, and AI-powered applications. Passionate about developing scalable, user-focused software.

EDUCATION

California State Polytechnic University

May 2026

Bachelor of Science, Computer Science, Minor in Mathematics

SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript, C++, C#

Frontend: React, Vue.js, TypeScript, HTML, CSS, Vite, Vue Router, Pinia

Backend: Node.js, Express, MongoDB, REST APIs

AI & Tools: Google Gemini (Gemma 4), Git, GitHub, Android Studio, Prompt Engineering, AI Integration

Practices: Agile/Scrum, CI/CD, Code Reviews, Debugging & Testing, Responsive Design

Languages: English (Fluent), Spanish (Fluent)

WORK EXPERIENCE

Software Engineer (Confidential Startup)

May 2026 - Present

- Develop and maintain frontend features using Vue.js, TypeScript, Vite, Pinia, and Vue Router to build responsive application experiences.
- Implement authentication, protected routes, and authenticated/unauthenticated user flows to support secure access.
- Contribute to OAuth integrations, including Apple Sign-In troubleshooting and authentication flows.
- Test and debug features using Playwright and TypeScript, resolving issues and improving reliability.
- Collaborate through GitHub, pull requests, code reviews, and Agile/Scrum practices to deliver features and resolve issues.

TECHNICAL PROJECTS

Maternal Resource Exchange – Frontend & AI Engineer - BroncoHacks

April 2026

- Engineered responsive React interfaces and stage-based logic to deliver personalized resource recommendations, addressing waste from 130M+ discarded baby clothing items annually.
- Integrated Google Gemini (Gemma 4) to construct an AI-powered listing assistant, automating item classification and improving listing accuracy while reducing manual input.
- Created AI-driven safety checks using condition detection and recall API validation to simplify unsafe or defective listings and improve platform reliability; awarded Best Use of Gemma 4 (150+ participants).

Skill Swap – Frontend Developer- AthenaHacks

March 2026

- Built a React web application enabling users to exchange services through a cost-free, skill-based barter system, designed to scale 1,000+ users.
- Designed UI components for requests, browsing, and messaging to support seamless interaction and efficient coordination between users.
- Implemented authentication-based navigation and collaborated using Git to provide a functional product under tight hackathon deadlines.

ParkIt Web App – Software Engineer

September 2025 - December 2025

- Collaborated with an Agile Scrum team to design and deliver features for a parking platform serving thousands of users.
- Built responsive React components that enhanced usability and streamlined the parking experience.
- Developed backend services using Node.js, Express, and MongoDB to support scalable data management and reliable application performance.

PetMinder – Full-Stack Developer – Mobile App Development

November 2025 - December 2025

- Delivered an Android application that streamlined pet care management and improved daily task organization.
- Added interactive pet profiles and calendar functionality to improve organization and the overall user experience.
- Contributed to both frontend and backend functionality to deliver a reliable and intuitive mobile application.

LEADERSHIP & CAMPUS INVOLVEMENT

FIFA World Cup Volunteer – Workforce Management Uniform Distribution Team

April 2026 – July 2026

- Organized and distributed uniforms to FIFA World Cup staff and volunteers while supporting high-volume event operations.
- Prepared uniform orders and ensured items were accurately sorted and ready for timely pickup and distribution.
- Assisted staff and volunteers with uniform needs, answered questions, and resolved issues to provide a positive experience.

BroncoHacks Website – Frontend Developer

February 2026 - March 2026

- Developed a responsive React website from Figma designs for Cal Poly Pomona's BroncoHacks event.
- Built reusable components and registration workflows to improve scalability and user onboarding.
- Collaborated with team members to troubleshoot issues, integrate feedback, and deliver a functional website for the BroncoHacks event.
